## Strategic Planning

Our clients call upon us to assist them with difficult new directions necessitated by change. This may include various factors including competency assessment, performance and measurement compensation systems, workflow analysis or even the evaluation of systems design and interface. We also provide training needs assessment and will design and facilitate training development. Our staff has the practical as well as the theoretical ability to analyze the specific situation and make strategic recommendations to accomplish the intended result based on numerous factors including cost benefit analysis.

- Competency assessment
- Workflow analysis
- Systems approach
- Performance measurement and compensation systems
- Training needs analysis, design and development
- Recruitment, selection and retention
- Staffing models
